HOW TO RUN Garuda 1.0beta public-review on MAC

The security and privacy policy on Mac OS 10.7 and above may prevent the launch of Platform on Mac OS with the following error:

HOW TO SOLVE THE PROBLEM?

1. First launch Systems Preferences from the Apple Menu
2. Next, select Security and Privacy option from the Window

3. In the General tab of Security and Privacy, please select the option “Anywhere” for the item “Allow applications downloaded from”. 
4. Now, try relaunching the platform app and it should work!

Note: You would need Admin privileges to make the above change.
